

1.7.9 DRAINS.

There are many drains in the state. These drains are linked up with inter taluka or inter-districts. Several drains are long and having a large capacity. Several drains are also passing from near by villages or town. Due to heavy to very heavy rainfall in the catchment areas of drain, the drains causes damages to land, crops, property, cattle of the adjoining areas. Sometimes it is difficult to approach the drain sites, particularly when the drain overflows and makes breaches in the banks of the drains.

The Executive Engineer, in charge of drain has to function as a “FOCAL OFFICER” and has to take the necessary action. The Deputy Executive Engineer now called as “Sub-Focal Officer” who is physically in-charge of the drains, has to take necessary action and make efforts to control the situation.

The Sub-Focal Officer in-charge of the drains has to intimate his higher authorities and revenue authorities like Mamlatdar, Prant Officer, Collectors, Police Authorities, Home Guard Authorities regarding the situation. All authorities are requested to extend the help required by the sub-focal officer to over come the situation.
